

This station is conducting agrilclinic and giving Farm Advisory Service to pineapple and passion fruit growers throughout Kerala and also outside Kerala. The farmers can approach the station for various agro advisory services on the cultivation and utilisation of pineapple, passion fruit and other tropical fruit crops including banana, mango, jack, papaya, passion fruit, rambutan, mangosteen etc. Farmers can also bring their plant samples infected with various diseases or infested with various insect pests for getting the problems identified and suitable recommendations to control them. Technologies are available for the scientific cultivation, processing, value addition, quality testing and utilisation of pineapple and passion fruit.
